

FISCHEMICALS ABERDEEN

HIGHLY PURIFIED WATER

Description

This product is water which has been treated in a reverse osmosis plant to remove all contaminants including chlorine and total dissolved solids which may enhance corrosion in specialised offshore equipment and processes.

Chemical Analysis

pH	7.4 - May vary
Nitrate (mg NO ₃ /l)	<0.001
Nitrite (mg NO ₂ /l)	<0.001
Chloride (mg/l)	0.271
Sulphate (mg/l)	0.237
Hardness (mg/l CaCO ₃)	<1.00
Total Dissolved Solids (mg/l)	7
Conductivity µS	<10
Calcium (mg/l)	<0.020
Magnesium (mg/l)	<0.050
Phosphate (mg/l)	0.928

Applications

For use in any process where water to the highest specification is required where levels of impurities are negligible.
