## BLUE STEEL PRIMER

### Description

Blue Steel Primer is the environmentally friendly, easy to use primer for steel that doesn't cost the earth.

The development of Blue Steel Primer rust treatment, with a technologically advanced formulation to chemically convert rust, marks a major step forward in the continuous battle against corrosion.

Rust hates Blue Steel Primer.

From major steelwork maintenance jobs on pylons, offshore oil platforms, pipelines, bridges and ships to rust control on cars and caravans, Blue Steel Primer has proved safe and economic to use, with long lasting power and durability for today's toughest rust prevention tasks. In contrast to some mechanical methods of cleaning rusted steel surfaces, which cannot cope with deeply adhered rust, Blue Steel Primer quickly gets right to the heart of the problem for highly effective maintenance – on schedule.

The chemically induced rust conversion process, which - unlike other methods of surface preparation – thrives in damp, humid conditions, produces a stable iron oxide complex to significantly inhibit further rust accumulation.

### Features and Benefits

- ✓ Water based, non-flammable
- ✓ Easy and safe to apply
- ✓ Removes the need for costly shot blasting
- ✓ Proven value for money
- ✓ Makes paint systems last longer
- ✓ Can be applied in damp, humid conditions
- ✓ Tested and proven in the North Sea

### Properties

Coverage rate : 12m<sup>2</sup>/litre  
Touch Dry : Up to 24 hours  
Full reaction : 24 hours  
Overcoating : After 8 hours
