EMULSIFYING DEGREASER

Description

Emulsifying Degreaser is a water emulsifiable paraffinic hydrocarbon solvent.

Applications

Emulsifying Degreaser is non-caustic, non-alkaline and is safe on most painted surfaces. It finds considerable acceptance for removing heavy grease and oil from vehicle engines, chassis parts, machinery, metal, concrete and for cleaning equipment and small parts prior to storage, painting, plating or finishing. It can be sprayed, brushed or poured on the surface to be cleaned and hosed off with water (preferably under pressure). It may be used in a dip tank.

Directions

This product must only be used neat.
